Salary: Negotiable (PT/Perm)

Highly accomplished Pharmacist and newly minted Associate AI/ML Developer, with 14 years of extensive medical/pharmaceutical industry experience and a passion for technology education. Adept at distilling complex information into actionable insights, I am poised to leverage my deep industry knowledge and comprehensive AI/ML skillset – including cloud-based model development and business applications – to train, empower, and scale AI capabilities across the ASEAN region, with a specific interest in optimizing supply chains and regulatory compliance through AI.

Skills

AI/Machine Learning: Python (Pandas, NumPy, Scikit-learn, Plotly, Streamlit, TensorFlow/PyTorch - if applicable from course), Time Series Forecasting (N-BEATSx, Interpretable N-BEATS, Fast Directional Forecaster).

Cloud & AI Platforms: Microsoft Azure (Azure Machine Learning Workspace, Azure AutoML, Azure ML Designer, Azure Data Services, Azure Functions, Azure Container Instances, Azure Cognitive Services).

Automation: n8n, Zapier

Data Management: Data cleaning, validation, feature engineering, API integration, web scraping.

Regulatory & Compliance: HSA regulations, GMP, Import/Wholesale licensing (Therapeutic Products, Medical Devices, Controlled Drugs), Audit management, SOP development.

Business Development: Regional market expansion, Channel distribution, Strategic partnerships, Market analysis, Sales leadership.

Project Management: ASANA, Google Suite, Cross-functional collaboration, Stakeholder management.

Communication & Training: Technical Communication, Presentation Skills, Mentorship, Stakeholder Engagement.

Languages: English (Highly Proficient), Chinese/Mandarin (Proficient), Bahasa Indonesia (Basic), Burmese (Conversational).

Education

SkillsFuture Career Transition Programme (SCTP) - Associate AI/ML Developer Course | NTUC Learning Hub

Completion: July 2025

- **Key Modules/Skills:** Machine Learning Models (N-BEATSx, Interpretable N-BEATS, Fast Directional Forecaster), Python Programming, Data Processing (Pandas, NumPy), Web Application Development (Streamlit), API Integration, Web Scraping, Model Deployment & Monitoring, Performance Validation (Walk-Forward Validation, Bootstrap Testing).
- **AI for Business Innovation:** Deepened understanding of advanced AI applications, including process automation, customer experience enhancement, and data-driven decision-making. Developed industry-specific AI strategies, navigated ethical considerations, and mastered the distinctions between traditional and generative AI for practical business implementation.
- **Building AI Models using Microsoft Azure:** Gained hands-on experience with end-to-end AI model development on Azure, covering Azure Machine Learning Workspace setup, data collection & storage (Azure Data Services), model training (Azure AutoML, Azure ML Designer), evaluation, optimization, and deployment as web services using Azure Functions and Azure Container Instances. Explored Azure Cognitive Services.
- Developed practical automation solutions using n8n and Zapier.

Bachelor of Science (Pharmacy) (Hons) | National University of Singapore

June 2005 – May 2009

- Singapore Pharmacy Council licensed Pharmacist (since 2010)
-

AI/ML Projects

Singapore COE Price Prediction Platform

Associate AI/ML Developer Capstone Project

- Developed a Streamlit-based machine learning platform to forecast Singapore COE bidding prices across all vehicle categories with high accuracy.
 - Implemented three distinct time series forecasting models: N-BEATSx (92.7% accuracy), Interpretable N-BEATS (90.6% accuracy), and Fast Directional Forecaster (88.9% accuracy).
 - Engineered a dynamic model ranking system based on price and directional accuracy, ensuring optimal performance with auto-updating capabilities based on new data.
 - Developed an automated data pipeline integrating with the Singapore Government Open Data API and web scraping for real-time, reliable data updates.
 - Designed and implemented an intuitive, interactive dashboard using Streamlit and Plotly for multi-model comparison, historical trend analysis, and category-specific insights.
 - This project demonstrates end-to-end AI/ML development, including advanced modeling, data engineering, and user interface design, providing a robust case study for practical AI application and teaching scenarios.
 - Utilized rigorous validation methodologies including walk-forward validation and bootstrap testing to ensure model stability and reliability across market conditions.
-

Professional Experience

Self-Employed, Business Consultant for Business Development, Regulatory and Licensing Affairs (Medical) | Singapore

July 2017 – Present

- Providing regulatory and compliance consultancy to **SRG Pharmaceuticals (Malaysia)**, assisting with Generic Drug Applications (GDA) with Singapore's Health Sciences Authority (HSA).
- Provided expert Therapeutic Products and Medical Device Regulatory and Compliance Management consultancy to C-level executives, ensuring business goals were met.
- Led the establishment of pharmaceutical infrastructure, including warehousing and pharmacy setups for a Series-A funded Tele-health startup (Ora Group).
- Managed product life cycle launch and growth for men's and women's health therapeutic products, including Erectile Dysfunction, hair loss, and female contraception on Tele-health platforms.

- Directed the sourcing of generic manufacturers from India and Korea for in-licensing of therapeutic products, significantly improving cost efficiency.
- Managed import and wholesale licenses for diagnostic urine tests containing Controlled Drugs and developed the local company's Controlled Drugs SOP.
- Advised on corporate structure for Tele-health platforms to enhance cost efficiency and mitigate compliance risks, demonstrating ability to simplify complex regulatory frameworks.
- Collaborated cross-functionally with MARCOMM, Operations, and Tech departments in Singapore and Malaysia using ASANA and Google Suite.
- Provided regulatory and quality management advice to 3rd Party Logistics Companies (e.g., ST Engineering Synthesis, Kuehne + Nagel) for importation, wholesale, and re-exportation of therapeutic products and medical devices.
- Conducted internal and external regulatory audits, ensuring compliance to current standards and implementing corrective actions, and training relevant staff on new guidelines.
- Sourced and supplied critical medical consumables, including face masks and PPE, from overseas suppliers to meet increased demand during the initial phases of COVID-19 in Singapore/Hong Kong/China.

Notable Clients:

- **SRG Pharmaceuticals (Malaysia):** Assisting with Generic Drug Applications (GDA) with Singapore's Health Sciences Authority (HSA).
- **ST Engineering Synthesis Ptd Ltd (ST):** Managed 3rd Party Logistic warehousing for Therapeutic Products and Medical Devices.
- **Blaz Protection Systems & Precision Fabricators Pte Ltd:** Handled Controlled Drug importation and wholesale licenses application and local distribution.
- **Scigen Pte Ltd:** Conducted Internal Qualification audit and external 3rd party vendor Certification audits.
- **Kuehne + Nagel Pte Ltd (KN):** Facilitated Therapeutic Products and Medical Devices "importation-for-re-export" licenses with HSA.
- **PX Ventures / Ora Group:** Assisted with Tele-health business set-up and generic product sourcing in Singapore and Malaysia markets.
- **Advagen Pte Ltd:** Served as Responsible Person (RP) and regulatory advisor for product registration, wholesaling, and distribution of generic oncology products.
- **Call Lade Enterprise:** Conducted a business feasibility study of Krill Oil Supplements in Singapore and Malaysia, including sourcing, capsulation, and setting up distribution channels.

Unity Healthcare Pharmacy (Singapore), Locum Retail Pharmacist | Singapore

April 2015 – Present

- Dispensed medications on-site and remotely via teleconference, covering various Unity Pharmacy retail outlets and serving an average of 100 customers daily.
- Provided comprehensive medication counselling and professional advice on supplements and medical products to patients, demonstrating strong communication and educational skills.
- Assisted in dispensing sexual and reproductive health medication for online telemedicine service, Ease Healthcare.

JWD Co. Ltd, Managing Director | Yangon, Myanmar

April 2014 – February 2021

- Owned and managed **Sapel Traditional Burmese Spa** Group, a chain of spas and a Chinese restaurant with 50 staff.
- **Successfully established and operated Sapel Traditional Burmese Spa, which was ranked as the #1 spa in Yangon on TripAdvisor, demonstrating exceptional customer satisfaction and business excellence.**
- Oversaw profitability, business continuity, and investments in the tourism industry for the entire group.
- Managed local business partnerships for marketing and expansion through collaboration and cross-marketing.
- Oversaw online and offline marketing activities within allocated budgets.
- Managed Profit and Loss reports for individual stores, ensuring overall operational profitability, and updated investors quarterly.

Nagase Singapore Pte Ltd, Business Development Executive/Pharmacist (Medical Devices/Pharmaceutical Products) | Singapore

May 2010 – April 2014

- Developed and expanded sales in clinical diagnostics and pharmaceutical industries across Singapore, Malaysia, Vietnam, Thailand, and Indonesia.
- Achieved 50% year-on-year growth in the medical business in 2013, managing an annual local business volume exceeding USD1.2 million.
- Managed a regional sales team of 5 staff across various ASEAN offices and oversaw channel distribution, including training and onboarding new team members.

- Conducted market surveys and business analysis for new product distribution in ASEAN and Oceania.
 - Established new medical business avenues in Thailand and Indonesia by appointing distributors after successful negotiations.
 - Negotiated with global suppliers for competitive pricing through forecast planning.
 - Completed registration of new and existing medical devices into SMDR and provided updates to Singapore's HSA.
 - Managed correspondence with authorities (NEA CRPNS, MOH Biosafety, Singapore Customs) for product import.
-
